

MANUAL BACKUP WRENCH

HYTORC has been the provider of the world's best industrial bolting equipment for more than 50 years and our Magnetic Backup Wrench is no different. This simple and convenient solution contains everything that you have come to expect from HYTORC with Superior Technology, Quality and Support.

RANGE OF SIZES

The high strength steel backup wrench is suited for heavy duty industrial bolting applications. The Backup Wrench comes in a range of sizes with 12-point cutouts so that it can be matched to the specific bolting job.

MAGNETIC LOCKS

The Backup Wrench is equipped with two high strength magnets embedded into the side of the unit. These magnets allow the wrench to be quickly installed and held in place against the side of a steel application.

ADJUSTABLE ARM

The Backup Wrench is provided with an adjustable arm that simplifies installation in a variety of configurations. The eye-bolt on the arm may be adjusted to quickly to lock the wrench in place or to unlock following the bolting operation. Add a lanyard to the eye-bolt to prevent drop hazards.

SUPERIOR TECHNOLOGY

The HYTORC Magnetic Backup Wrench is designed to cover a wide range of global applications while many other backup wrench designs on the market are too short. Whereas other backup wrenches are not rated for breakout operations, our Magnetic Backup Wrenches provide a good reaction point for your backup wrench because they are designed with the length, strength, and durability needed to handle the most demanding operations.

SUPERIOR QUALITY

Everything HYTORC puts its name on has the quality you have come to expect. Our Magnetic Backup Wrenches have been manufactured under the ISO 9001 Quality Management and ISO 14001 Environmental Management systems to ensure the highest level of quality while also protecting the environment. The Magnetic Backup Wrenches have been heat treated for added strength and coated to prevent corrosion.

SUPERIOR SUPPORT

Have questions? HYTORC is available 24/7 no matter where you are located. There is always someone available to help. We offer a full range of metric and imperial sizes that are ready for immediate delivery for sales or rentals. Let us help you get exactly what you need to get the job done. Every HYTORC product comes with free training and backed by our 12-word, 12-month warranty: **You break it under normal use. We fix it free of charge.**

HYTORC BACKUP WASHER

The ultimate solution for safe bolting is to eliminate pinch points and drop hazards associated with backup wrenches by utilizing the HYTORC Backup Washer. Only the HYTORC Backup Washer can do that. Contact us to learn more about our HYTORC Backup Washer, an inexpensive alternative to traditional heavy and dangerous backup wrenches.

HAND SAFETY

When dealing with large, heavy products that require comparably large, heavy equipment, industrial bolting can become a safety issue with the potential for costly consequences. HYTORC eliminates pinch points that are the cause of common hand and finger injuries. For more information, please visit: HYTORC.com/hand-safety
